

LIST OF TOPICS

- Neurosonology of the autonomic nervous system and cerebrovascular regulation
- Ultrasound in neurointensive care
- Cerebral small vessel disease
- Acute stroke and endovascular treatment
- Ultrasound in primary and secondary stroke prevention
- Microembolus detection
- Neuro-ophthalmology and multiple sclerosis
- Neurosonology in the assessment of headache
- Pearls and pitfalls for clinical applications of Neurosonology
- Ultrasound in venous sinus thrombosis
- Ultrasound of nerves and muscles
- Parenchymal brain imaging
- Technological development of ultrasound methods
- Focused Echocardiography in Neurosonology
